The [U.S. National Toxicology Program](#) has found cell phone radiation causes cancer and DNA damage. Additional [peer-reviewed, published studies](#) link wireless radiation to our growing rates of insomnia, headaches, nose bleeds, nausea, pain, cognitive impairment, fatigue, behavior issues, learning disabilities, autism, anxiety, depression, suicidal ideation, neurotoxicity, digital addiction, infertility, and more. This type of radiation is constantly pulsed from our wi-fi devices, routers, smart utility meters, cell towers and the new close-range 4G/5G small cell antennas – unless we develop strategies to use technology safely.

Join leading experts to learn the science, risks -- and safe technology solutions for La Plata:

- [Cece Doucette, MTPW, Technology Safety Educator, introduced legislation](#) and helped her schools become the [first in the nation](#) to safeguard students and staff
- Timothy Schoechle, PhD, Prof. Emeritus CU and CSU, telecommunications expert, [Author of Reinventing Wires: The Future of Landlines and Networks](#)
- Sheena Symington, B.Sc., MA, Director, [Electro Sensitive Society](#)
- Virginia Farver, advocate and parent of son who died of brain cancer from a cell tower on school campus, petitioner with [Children's Health Defense vs. FCC lawsuit](#)
- [Coloradans and La Plata for Safe Technology](#) members

In preparation we suggest you:

- Watch the award-winning film [Generation Zapped](#) (free if your library subscribes to [Kanopy](#) or [Hulu](#), or download for a small fee [here](#)) and/or
- Take the quick [Schools & Families Course](#) from the non-profit Wireless Education
