

5G Satellite Protest Rally March 19th at SpaceX, Hawthorne, CA

Dear Friends Against 5G,

Like never before, the time to take action is NOW or it may be too late!

I'll get right to the point. We are planning a **national protest rally** at the headquarters of **SpaceX** in Hawthorne, CA, and possibly other sites around the US. The events will take place on Friday, March 19th, 2021, and will "kick off", and be the centerpieces of the next 5G Global Protest Day, which is scheduled for the following day, March 20th.

The rallies will protest the **satellites** SpaceX is deploying to provide wireless internet to every corner of the globe using 5G technology. To date, SpaceX has submitted applications to the FCC for 42,000 satellites. As of October 24th, 2020, the company had approximately 858 satellites orbiting in the earth's ionosphere, and public beta testing started on October 26th.

As we are all electrical beings, the consequences will be catastrophic to us, wildlife, plants, trees, and all living beings. As author and scientist, Arthur Firstenberg points out in his best-selling book, *The Invisible Rainbow*,

"The roots of our life-support system are firmly anchored in the pillars of the earth's magnetic field, far above our heads, where the pulsations of the universe, nourished and watered by the sun, are absorbed, animating all living things below....Satellites have a profound effect...because they are already IN the earth's magnetosphere. ...radiation from satellites works its full force on the magnetosphere."

Unfortunately, SpaceX is not the only company launching satellites. One Web has launched 36 satellites and Telesat, Amazon, Facebook, Lynk, Google, EarthNow, SpaceMobile and others all have plans to join the global 5G race with their own fleets of satellite networks. Many other countries also have satellite programs. Ideally, we would be protesting all of these, but are focusing this time on SpaceX as they will be leading the charge.

Safe Technology and Pro-Health & Environmental organizations throughout the US are collaborating on this event including *Stop 5G International* (www.stop5ginternational.org), *Environmental Health Trust* (www.ehtrust.org), *Americans for Responsible Technology* (www.americansforresponsibletechnology.org), *Children's Health Defense* (www.childrenshealthdefense.org), *Mom's Across America* (www.momsacrossamerica.com), *5G Free California* (www.5Gfreecalifornia.org), *We Are the Evidence* (www.wearetheevidence.org) and many more. We would love your participation as well.

Our primary goal will be raising awareness about the dangers posed by satellites - complemented by millions of terrestrial User Terminals, 5G antennas, and Earth Stations. These dangers include satellite collisions, depletion of the ozone layer, space debris accumulation, pollution from rocket launches, interference with astronomical research and weather forecasting, and effects on wildlife and humans from yet more wireless radiation than our current already harmful levels.

Another goal is to put SpaceX on notice that there will be accountability for the satellites and to that end we are asking to meet with Elon Musk, SpaceX chairman, or his brother Kimbal, SpaceX board member, to begin an honest and open conversation about satellite dangers.

Help us get the word out about the rally and attend if you can!

- ! First, PLEASE send this letter and the attached flyers (1 and 2-page) to all of your contacts in this movement – including celebrities you know in the Los Angeles area that have expressed their support for the Stop-5G movement and/or other environmental issues. Feel free to post and distribute the flyer far and wide.
- ! Next, post a link to the home page of the event on your website or create your own page!
<https://stop5ginternational.org/5g-spacex-satellite-protest-march-19-2021/>
- ! Also, think about joining our organizing committee which meets via Zoom every other Thursday at 3:00 PST, Our focus now is how to get the word out as widespread as possible to our contacts and the media. Contact us for the next meeting date and invite.

The planet is calling out to us. If ever there was an existential crisis on earth, we are in it now. Please join us in taking action and spreading the word about this protest rally with the underlying message that *we need to change course before it is too late* – And halting the satellite program is a good place to start.

Please sign up to attend the rally and help us build the momentum! <https://stop5ginternational.org/5g-spacex-satellite-protest-march-19-2021/>

Thank you so much and we look forward to working with you.

Yours,
